

Global Megatrends Commentary¹

August 2022

Rapid change is disrupting the status quo across industries and around the world. Our Thematic strategies seek to keep investors on the right side of disruption by looking beyond backward-looking benchmarks to identify innovative, attractively-valued companies aligned with durable secular growth themes including tech advancement, environmental sustainability, the future of health care, and the new age consumer.

Following a phenomenal period of growth and spending as the global economy recovered from the COVID pandemic-induced downturn, the equity market has pulled back in recent months, driven by fears around inflation, an assumed demand pull-forward, and geopolitical uncertainty. In our view, a pull-back is healthy as valuations had become elevated, especially in certain parts of the market. Valuations of innovation equities are now below their five-year average. We believe this offers investors the opportunity to gain exposure to innovation at a much more reasonable price.

Going forward, we believe innovation equities continue to be well-positioned to outperform, even in an inflationary, rising rate environment. Ultimately, we believe the long-term growth we are likely to see in these businesses will outweigh the current tension from higher rates and other short-term structural pressures. We foresee demand for the companies in which we are invested, which benefit from strong secular tailwinds – cybersecurity, sustainability, digital transformation, decarbonization, health care innovation, and tech-enabled consumption, to name a few – accelerating rather than slowing. That said, we believe active management is even more important in the current environment, as being selective at the company level and building well-balanced portfolios will likely be key to long-term success. Overall, we retain conviction in the multi-decade secular growth themes on which our portfolios are focused, continue to believe that companies on the right side of these themes may be well-positioned to outperform, and view the market pull-back as offering an attractive entry point for long-term investors.

Market Review	2
Performance Commentary	3

Market Review²

Global equities lost gains of the prior month in August, returning -3.68% (total returns in USD). Markets remained resilient during the first half, focusing on US economic data and corporate earnings. However, sentiment turned negative in the latter half driven by the rampant spread of COVID-19 in China, US-China-Taiwan tensions, and Jerome Powell's speech at Jackson Hole.

Corporate earnings³ for the second quarter proved to be stronger-than-expected at the aggregate level, fueling a short-lived market rally in the nascent stages of the month. Market concerns around the progression of earnings and the bottom-line impact of rising prices and persistent inflation remained high. Non-farm US payrolls continued to be on the uptick, which along with the release of CPI and PPI numbers stoked market expectations around the peaking of inflation. However, Jerome Powell's speech at Jackson Hole extinguished these hopes, highlighting the need to keep on top of inflation and setting expectations around the persistence of a high interest rate.⁴

Nancy Pelosi's visit in Taiwan gave birth to new geopolitical tensions with the subsequent execution of military drill by China around the region straining US-China diplomatic relationships. Inflationary concerns in Europe continued to be at an all-time high with the aggressive monetary policy stance of ECB stoking fears about an economic slowdown in the region.

The domestic situation in China continued to worsen as COVID-19 cases continued to be on the uptick. In line with the government's zero tolerance policy, lockdowns were imposed in the areas of Shenzhen and Chengdu. These lockdowns in addition to the existing crisis in the real estate sector raised market concerns around a slowdown in Chinese economic activities. To allay concerns and strive up the economy, the government announced stimulus packages with the PBOC cutting interest rates. However, market sentiment for the region continued to remain negative.

During the month, the Energy sector was the sole generator of positive returns with the Health Care and Information Technology sectors declining the most from overall returns.

Performance Overview

Goldman Sachs Global Millennials Equity Portfolio

- The GS Global Millennials Equity Portfolio returned -3.66% in the month of August outperforming MSCI ACWI Growth by 95 bps and MSCI World by 52 bps. This brings since inception returns to 11.67% underperforming MSCI ACWI Growth by 12 bps and outperforming MSCI World by 149 bps.
- At the country level⁵, our allocation to China and positions in Brazil contributed to portfolio performance during the month. On the other hand, our allocation to Netherlands and positions in the United States detracted from portfolio returns.
- At the sector level, our positions in Consumer Discretionary and under allocation to Health Care contributed to relative performance during the month. On the other hand, our positions in Materials and Industrials detracted the most from portfolio returns.
- At the stock level:⁶
 - **Locaweb (Contributor)** – The Brazil based software company was the top contributor for the month. The stock saw a rise in price on the back of better-than-expected 2Q results. This was mainly driven by a healthy growth in revenue from commerce solutions despite stiff local competition targeting small merchants in Brazil. We like the company given it is a one-stop shop offering end-to-end solution that touches the sellers' entire workflow from, lead generation (top of the funnel) to payment and delivery. We believe that the company has an impressive growth trajectory in an under penetrated market and expect its gross merchandise value to more than double in the next 5 years.
 - **Ball Corporation (Detractor)** – The US-based producer of sustainable metal packaging, was the biggest detractor from relative returns during the month. The company underperformed due to poor quarterly results driven by a slowdown in consumer demand. The management also lowered their future guidance and announced plans for the closure of 2 old manufacturing plants and slowing rate of capacity addition going forward. We continue to like the company for its market leading share in aluminium manufacturing. Given the strong demand outlook of the beverage-can industry driven by a shift from plastic bottles to aluminium cans, we don't anticipate the long-term investment thesis for the holding to change. As such, we remain invested due to increasing global demand for sustainable products and packaging solutions and its leading position in the industry.

Discovery Life Investment Services (Pty) Ltd, branded as Discovery Invest, is an authorised financial services provider. Company registration number 2007/005969/07.

Goldman Sachs Global Environmental Impact Equity Portfolio

- The I Acc share class of the GS Global Environmental Impact Equity Portfolio delivered -3.75% (net of fees, USD) in absolute returns underperforming the benchmark by a modest 6 bps in the month of August. This brings since inception returns to 10.3% (annualized, net of fees, USD) outperforming the benchmark by 643 bps.
- At the country level, the portfolio's stock selection in the US and Japan supported relative performance during the month. On the other hand, our positions in Netherlands and China detracted the most from portfolio returns.
- At the sector level, our positions in Industrials and underallocation to Health Care supported portfolio performance during the month. On the other hand, our positions in Materials and Energy detracted from portfolio returns⁷.
- At the stock level:⁸
 - **Wolfspeed (Contributor)** – The top contributor for the month was Wolfspeed, a semiconductor powerhouse focused on silicon carbide and GaN technologies, leading the worldwide transition from silicon, a less efficient semiconductor. The stock rallied after the company released solid quarterly results with revenues and gross margins 10% and 10bps head of consensus respectively and a very strong outlook. Management noted that Silicon carbide demand is stronger than expected in the longer term. Consequently, they believe that they could achieve revenues that are 30-40% higher than their original FY26 targets. The company continues to be well positioned in the Silicon carbide market and is expected to see strong revenue and margin inflection as their new Mohawk valley fab begins volume production. Wolfspeed's product portfolio provides disruptive technology solutions that support a more efficient, sustainable future including electric vehicles, fast charging, 5G, power supplies, renewable energy and storage, as well as aerospace and defense. Compared to alternatives, the company's products sold in 2019 will save approximately 140 MMT of carbon dioxide equivalent over their lifetime which is equal to the CO2 savings from 31,000 wind turbines running for one year.
 - **SolarEdge (Detractor)** – The top detractor for the month was SolarEdge, a leading player in the solar inverter space where it has been consistently gaining market share driven by its unique power optimizer based inverter solution. The stock fell after the company released its 2Q results where it shared better than expected revenues but the bottom line missed consensus expectations. The earnings took a short term hit due to 2 reasons: strong USD and COVID lockdown in China impacting one of their key component suppliers. We believe both the factors are short term in nature and we continue to maintain a mid-size position in the stock as we remain constructive on the long-term value creation potential of the company. We like the company for its focus on technology, ambition to expand into adjacent domains like EV powertrain and its dominant position in the US residential solar market. We believe SolarEdge is very well placed to benefit as the world transitions towards Clean Energy and Clean Mobility solutions.

⁷ Portfolio holdings and/or allocations shown above are as of the date indicated and may not be representative of future investments. The holdings and/or allocations shown may not represent all of the portfolio's investments. Future investments may or may not be profitable.

Your capital is at risk and you may lose some or all of the capital you invest

Discovery Life Investment Services (Pty) Ltd, branded as Discovery Invest, is an authorised financial services provider. Company registration number 2007/005969/07.

Goldman Sachs Global Future Technology Leaders Equity Portfolio

- The I Acc share class of the GS Global Future Tech Leaders Equity Portfolio delivered -0.58% (net of fees, USD) in absolute returns outperforming the benchmark by 320 bps in the month of August. This brings since inception returns to 7.52% (annualized, net of fees, USD) outperforming the benchmark by 329 bps.⁹
- At the industry level, our stock selection in Software and Semiconductos & Semiconductor Equipment contributed the most to outperformance during the month. Our underweight to Internet & Direct Marketing Retail and stock selection in IT Services were what detracted the most from portfolio returns.
- At the stock level:¹⁰
 - **Atlassian (Contributor)** – Atlassian an Australian software company that develops products for software developers, project managers, and other software development teams, was a top contributor to returns. Atlassian reported fiscal year 4Q earnings during the month with revenues 5% above consensus estimates driven by strong performance in its cloud business. Its revenue guidance for next quarter was 4% above consensus and management reiterated its cloud revenue growth of 50% year-over-year, first noted during Atlassian’s investor day in April of this year. The quarter was strong on both new customer adds and cross-selling to existing customers. Atlassian noted it has not seen an impact to the pace of cloud migrations due to the difficult macro backdrop. We think Atlassian is a unique company with best-in-class products at a very reasonable price point for customers. This makes the company relatively insulated from a decrease in spending by customers as it is often a cheaper option. Secondly, its cloud business has better unit economics with higher net revenue retention than peers. Management reiterated all the three messages that presented at its investor day – line of sight to \$10 billion in annual revenue organically, 50% cloud revenue growth for next 2 years, and profit margins in the mid-teens for next fiscal year. The company noted that margins are expected to be higher than mid-teens in the first half of next fiscal year followed by a dip in second half as Atlassian continues to hire, primarily in R&D. We view continue to view Atlassian as a core holding in our portfolio.
 - **AppLovin (Detractor)** – AppLovin, a service that enables mobile app developers of all sizes to market, monetize, analyze, and publish their apps through its mobile advertising, marketing, and analytics platforms, was a top detractor from performance during the month. AppLovin reported 2Q22 earnings, which were below consensus due to macroeconomic headwinds to the mobile app industry and privacy policy updates that have impacted the discovery of apps over the last few quarters. We believe, at current multiples, AppLovin is undervalued on an EV to EBITDA basis relative to high-growth software companies. We will continue to monitor the company for further developments, but we continue to view AppLovin favorably.

Discovery Life Investment Services (Pty) Ltd, branded as Discovery Invest, is an authorised financial services provider. Company registration number 2007/005969/07.

Goldman Sachs Global Future Health Care Equity Portfolio

- The I Acc share class of the GS Global Future Health Care Equity Portfolio delivered -3.95% (net of fees, USD) in absolute returns outperforming the benchmark by 196 bps in the month of August. This brings since inception returns to -1.83% (annualized, net of fees, USD) underperforming the benchmark by 660 bps.¹¹
- At the industry level, our stock selection in Biotechnology and Health Care Equipment & Supplies contributed to outperformance during the month. On the other hand, our underweight to Health Care Providers & Services and stock selection in Health Care Technology detracted the most from portfolio returns.
- At the stock level:¹²
 - **Neurocrine Biosciences (Contributor)** – a pharmaceutical company developing products for the treatment of neurologic, psychiatric, and endocrine-related diseases and disorders – was the top contributor to relative returns during the month. At the beginning of the month, Neurocrine reported a strong quarter, with its key drug Ingrezza recording an all-time high in total prescriptions (11% growth quarter-over-quarter) and revenue of \$350 million in second quarter sales, beating consensus estimates by a healthy margin. Ingrezza accelerated new patient starts during the quarter, leading to one of the best growth quarters the brand has had to date. Neurocrine also raised full year guidance to \$1.35-\$1.4 billion, noting that its forecast still airs on the conservative side, as it factors in COVID- and telemedicine-related headwinds. We expect adoption of Neurocrine’s Ingrezza to accelerate as increased investment in direct-to-consumer advertising and an expanded salesforce drive new patient growth in the underpenetrated tardive dyskinesia (TD) market. Furthermore, we believe the company will continue to make smart investments to diversify its pipeline, offering long-term upside.
 - **Catalent (Detractor)** – a global provider of technologies that enable pharma, biotech, and consumer health companies to optimize product development, launch, and full lifecycle supply – was the top detractor to relative returns over the period. Catalent reported a fiscal 2023 sales outlook that missed consensus estimates, with foreign exchange representing a significant headwind. Its fourth quarter top line missed consensus expectations, and the company noted that its COVID-19 program is no longer expected to generate future revenues – which weighed significantly on the stock. On the positive side, adjusted per-share earnings rose to \$1.19 from \$1.16 a year earlier, coming in higher than the \$1.15 mean consensus estimate. Benefitting from increased demand for cell and gene therapy, biologics sales accelerated in the quarter. We remain constructive on Catalent because it is one of only a handful of companies that can make gene therapy drugs at scale, and it has strong relationships with J&J, AstraZeneca, and Moderna, among others, to produce vaccines. While COVID-19-specific growth has halted, we expect that non-COVID vaccine and gene therapy drug development – in addition to Catalent’s many other business lines – will continue to accelerate over the long term.

Appendix

GS Global Millennials Equity Portfolio

Risk and Reward Profile

This risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. It is possible that a portfolio stated to have a lower risk profile may in fact fall in value more than a portfolio with a higher risk profile.

The Portfolio is in category 6 as it mostly invests in shares and similar instruments which typically experience higher levels of price fluctuations than fixed income securities.

The capital is not guaranteed.

Other Material Risks:

- **Market risk** - the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** - material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk** - the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand.
- **Exchange rate risk** - changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. Hedging of this risk may not be fully effective and may increase other risks (e.g. derivative risk).
- **Custodian risk** - insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.

- **Derivatives risk** - derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.
- **Counterparty risk** - a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.
- **Emerging markets risk** - emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.
- **Stock Connect** - Stock Connect is a new trading programme and the relevant regulations are untested and subject to change. Investments through the Shanghai-Hong Kong Stock Connect are subject to additional risks, including amongst others, quota limitations, restrictions on selling imposed by frontend monitoring, ownership of securities held on Stock Connect applicable to certain rules, participation in corporate actions and shareholders' meetings, non-protection by any investor compensation scheme, differences in trading day, operational risk, recalling of eligible stocks and trading restrictions, trading costs (including tax), local market rules, foreign shareholding restrictions and disclosure obligations, clearing, settlement and custody risk, currency risk and default risk.
- **Sustainability risk** - an environmental, social or governance event or condition that could cause the value of the portfolio to go down. Examples of sustainability risks include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.
- **Concentration risk** - this is a concentrated asset strategy that is likely to exhibit a significantly greater fluctuations in asset values than a broad investment in a wide range of shares of companies.
- **For more detailed information on the risks associated with an investment in the Portfolio, please refer to the section in the Prospectus entitled "Risk Considerations" and discuss with your professional advisers.**

GS Global Environmental Impact Equity Portfolio

Emerging markets securities may be less liquid and more volatile and are subject to a number of additional risks, including but not limited to currency fluctuations and political instability. Diversification does not protect an investor from market risk and does not ensure a profit.

Past performance does not guarantee future results, which may vary. The value of investments and the income derived from investments will fluctuate and can go down as well as up. A loss of principal may occur.

Disclosures:

This material is provided at your request solely for your use.

There is no guarantee that objectives will be met.

Past performance does not guarantee future results, which may vary.

THIS MATERIAL DOES NOT CONSTITUTE AN OFFER OR SOLICITATION IN ANY JURISDICTION WHERE OR TO ANY PERSON TO WHOM IT WOULD BE UNAUTHORIZED OR UNLAWFUL TO DO SO. Prospective investors should inform themselves as to any applicable legal requirements and taxation and exchange control regulations in the countries of their citizenship, residence or domicile which might be relevant.

This material is provided for informational purposes only and should not be construed as investment advice or an offer or solicitation to buy or sell securities. This material is not intended to be used as a general guide to investing, or as a source of any specific investment recommendations, and makes no implied or express recommendations concerning the manner in which any client's account should or would be handled, as appropriate investment strategies depend upon the client's investment objectives.

Although certain information has been obtained from sources believed to be reliable, we do not guarantee its accuracy, completeness or fairness. We have relied upon and assumed without independent verification, the accuracy and completeness of all information available from public sources.

Views and opinions expressed are for informational purposes only and do not constitute a recommendation by Goldman Sachs Asset Management to buy, sell, or hold any security. Views and opinions are current as of the date of this presentation and may be subject to change, they should not be construed as investment advice.

This document has been issued by Goldman Sachs International, authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Documents providing further detailed information about the fund/s, including the articles of association, prospectus, supplement and key investor information document (KIID), annual/semi-annual report (as applicable), and a summary of your investor rights, are available free of charge in English language and as required, in your local language by navigating to your local language landing page via <https://www.gsam.com/content/gsam/ain/en/advisors/literature-and-forms/literature.html> and also from the fund's paying and information agents. If GSAMFSL, the management company, decides to terminate its arrangement for marketing the fund/s in any EEA country where it is registered for sale, it will do so in accordance with the relevant UCITS rules.

Offering Documents

This material is provided at your request for informational purposes only and does not constitute a solicitation in any jurisdiction in which such a solicitation is unlawful or to any person to whom it is unlawful. It only contains selected information with regards to the fund and does not constitute an offer to buy shares in the fund. Prior to an investment, prospective investors should carefully read the latest Key Investor Information Document (KIID) as well as the offering documentation, including but not limited to the fund's prospectus which contains inter alia a comprehensive disclosure of applicable risks. The relevant articles of association, prospectus, supplement, KIID and latest annual/semi-annual report are available free of charge from the fund's paying and information agent and/or from your financial adviser.

Distribution of Shares

Shares of the fund may not be registered for public distribution in a number of jurisdictions (including but not limited to any Latin American, African or Asian countries). Therefore, the shares of the fund must not be marketed or offered in or to residents of any such jurisdictions unless such marketing or offering is made in compliance with applicable exemptions for the private placement of collective investment schemes and other applicable jurisdictional rules and regulations.

Investment Advice and Potential Loss

Financial advisers generally suggest a diversified portfolio of investments. The fund described herein does not represent a diversified investment by itself. This material must not be construed as investment or tax advice. Prospective investors should consult their financial and tax adviser before investing in order to determine whether an investment would be suitable for them.

Swing Pricing

Please note that the fund operates a swing pricing policy. Investors should be aware that from time to time this may result in the fund performing differently compared to the reference benchmark based solely on the effect of swing pricing rather than price developments of underlying instruments.

The Global Industry Classification Standard (GICS) was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P) and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly

Index Benchmarks

Indices are unmanaged. The figures for the index reflect the reinvestment of all income or dividends, as applicable, but do not reflect the deduction of any fees or expenses which would reduce returns. Investors cannot invest directly in indices.

The indices referenced herein have been selected because they are well known, easily recognized by investors, and reflect those indices that the Investment Manager believes, in part based on industry practice, provide a suitable benchmark against which to evaluate the investment or broader market described herein. The exclusion of "failed" or closed hedge funds may mean that each index overstates the performance of hedge funds generally.

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.

An investor should only invest if he/she has the necessary financial resources to bear a complete loss of this investment.

Capital is at risk.

This material contains information that discusses general market activity, industry or sector trends, or other broad-based economic, market or political conditions. It also pertains to past performance or is the basis for previously-made discretionary investment decisions.

This information should not be construed as a current recommendation, research or investment advice. It should not be assumed that any investment decisions shown will prove to be profitable, or that any investment decisions made in the future will be profitable or will equal the performance of investments discussed herein. Any mention of an investment decision is intended only to illustrate our investment approach and/or strategy, and is not indicative of the performance of our strategy as a whole. Any such illustration is not necessarily representative of other investment decisions.

This material has been prepared by Goldman Sachs Asset Management and is not financial research nor a product of Goldman Sachs Global Investment Research. It was not prepared in compliance with applicable provisions of law designed to promote the independence of financial analysis and is not subject to a prohibition on trading following the distribution of financial research. The views and opinions expressed may differ from the views and opinions expressed by Goldman Sachs Global Investment Research or other departments or divisions of Goldman Sachs and its affiliates. Investors are urged to consult with their financial advisors before buying or selling any securities. This information should not be relied upon in making an investment decision.

Index Benchmarks

Indices are unmanaged. The figures for the index reflect the reinvestment of all income or dividends, as applicable, but do not reflect the deduction of any fees or expenses which would reduce returns. Investors cannot invest directly in indices.

The indices referenced herein have been selected because they are well known, easily recognized by investors, and reflect those indices that the Investment Manager believes, in part based on industry practice, provide a suitable benchmark against which to evaluate the investment or broader market described herein. The exclusion of "failed" or closed hedge funds may mean that each index overstates the performance of hedge funds generally.

disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Portfolio Holdings may not be representative of current or future investments. The securities discussed may not represent all of the portfolio's holdings and may represent only a small percentage of the strategy's portfolio holdings. Future portfolio holdings may not be profitable.

Economic and market forecasts presented herein reflect a series of assumptions and judgments as of the date of this presentation and are subject to change without notice. These forecasts do not take into account the specific investment objectives, restrictions, tax and financial situation or other needs of any specific client. Actual data will vary and may not be reflected here. These forecasts are subject to high levels of uncertainty that may affect actual performance.

Accordingly, these forecasts should be viewed as merely representative of a broad range of possible outcomes. These forecasts are estimated, based on assumptions, and are subject to significant revision and may change materially as economic and market conditions change. Goldman Sachs has no obligation to provide updates or changes to these forecasts. Case studies and examples are for illustrative purposes only.

This material is provided for informational purposes only and should not be construed as investment advice or an offer or solicitation to buy or sell securities. This material is not intended to be used as a general guide to investing, or as a source of any specific investment recommendations, and makes no implied or express recommendations concerning the manner in which any client's account should or would be handled, as appropriate investment strategies depend upon the client's investment objectives.

Any reference to a specific company or security does not constitute a recommendation to buy, sell, hold or directly invest in the company or its securities. It should not be assumed that investment decisions made in the future will be profitable or will equal the performance of the securities discussed in this document.

Effect of Fees:

The following table provides a simplified example of the effect of management fees on portfolio returns. Assume a portfolio has a steady investment return, gross of fees, of 0.5% per month and total management fees of 0.05% per month of the market value of the portfolio on the last day of the month. Management fees are deducted from the market value of the portfolio on that day. There are no cash flows during the period. The table shows that, assuming all other factors remain constant, the difference increases due to the compounding effect over time. Of course, the magnitude of the difference between gross-of-fee and net-of-fee returns will depend on a variety of factors, and this example is purposely simplified.

Period	Gross Return	Net Return	Differential
1 year	6.17%	5.54%	0.63%
2 years	12.72	11.38	1.34
10 years	81.94	71.39	10.55
