

How to link your device account directly to Vitality

Step 1:

Log into the Discovery website and open the [Fitness devices and apps](#) page.

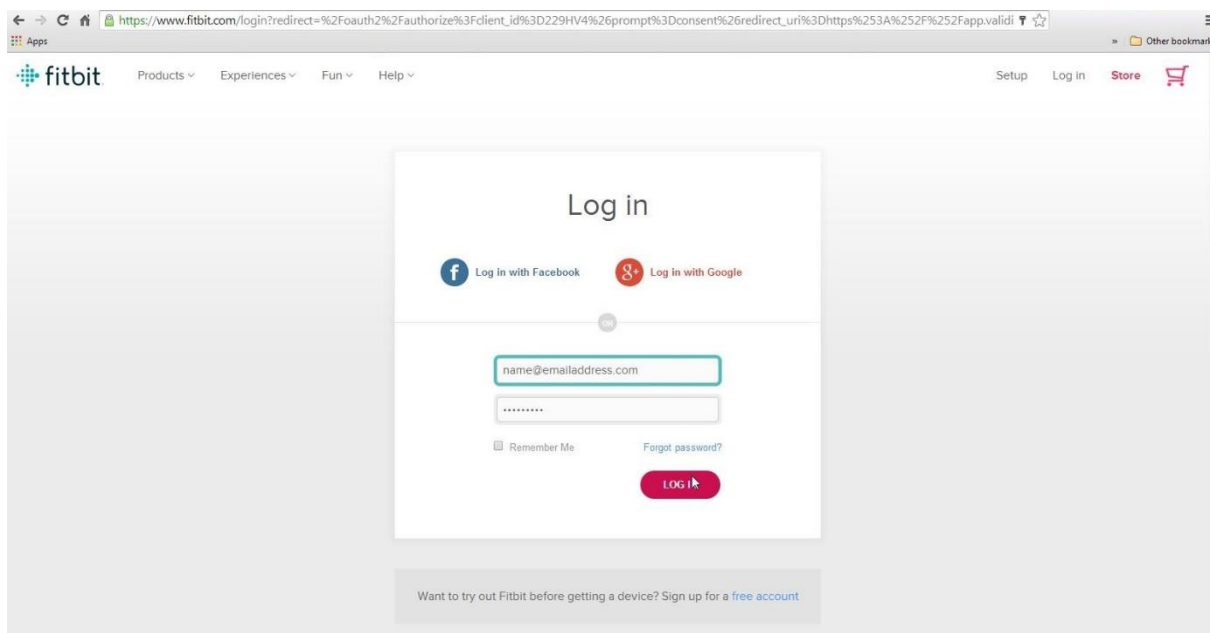

Step 2:

Click 'Link my account' green button which is seen below each device. We will be using the Fitbit account as an example for this step-by-step guide.

Step 3:

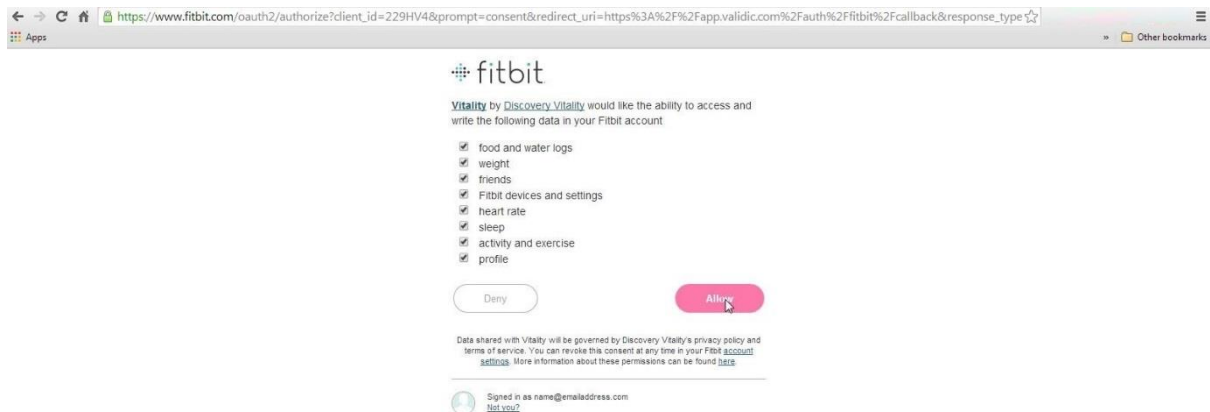

Input your existing account username and password or create a new account first. Then click 'Log in'.

Please do not log in using your Facebook or Google details or else Vitality will be unable to receive your step count information.

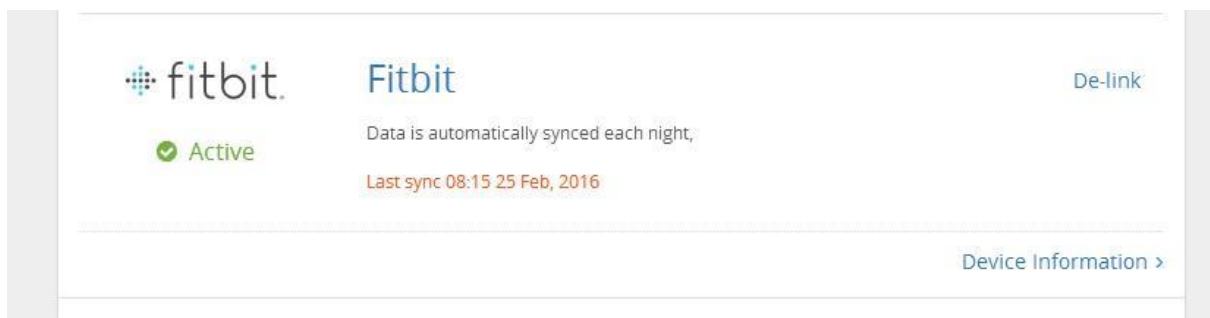

Step 4:

The Fitbit permissions screen will be shown. Ensure that 'activity and exercise' is ticked on the list of available data and then click on 'Allow'.

Step 5:

You will be redirected back to the [Fitness devices and apps page](#) and Fitbit will now be listed on the 'Your devices and apps' section.

Your fitness device is now correctly linked to Vitality – get active, track your activity, and get rewarded.
